

FREE HAM RADIO LICENSE CLASS

When: Starting March 9, 2019 Time 8:30am -12pm

Where: Davidsonville Family Rec Center 3789 Queen Anne Bridge Road

Our FREE Technician License Course is designed to introduce the average person to the world of Amateur Radio.

It requires no prior knowledge of radio or electronics, though you will learn some of both during the course.

The class is specifically designed to give you the skills needed to pass the FCC Element 2 Exam.

The Technician License comes with complete UHF and VHF privileges typically used for relatively local communication, and some limited access to the HF bands and the rest of the world.
